AUSTRALIAN OWNED AND MANUFACTURED

Capability Statement

Air-operated solids pumping systems

Solidsvac are an ISO 90001 QMS accredited manufacturer of patented IECEx certified Zones 0 and 1 vacuum-loading solids pumps in Caboolture, Queensland. Our 100% compressed air equipment is employed globally recovering and transferring abrasive slurries, viscous sludge and materials with high solids content.

Equipment and services

Pumps and recovery systems

SV40, SV70 and SV100 vacuum-loading pumps, SV150-CVCD and SV220-CVCD continuous pumps, plus Vac-Pack and SV-DVU systems for vessel loading and dry media recovery.

Sales and hire

Pump selection for your material, flow rate, transfer distance and available compressed air. Hire units are available with accessories and on-site setup.

Service and training

Maintenance, repairs, spare parts and operator training, with support from an authorised distributor network worldwide.

Industries and applications

Mining and minerals processing

Underground sump clean-out, mine slurry transfer and thickener desludging.

Oil and gas

Drill cuttings and drilling mud transfer, plus tank-bottom sludge recovery.

Marine and industrial

Shipboard waste recovery, plant clean-up and spill recovery.

Water and wastewater

Sludge removal from treatment ponds and digesters.

Tunnelling and construction

Tunnel sump clean-out and abrasive spoil recovery.

Experience and Technical Expertise

The Solidsvac team bring with them over 50 years of hands-on experience in the design, manufacture and use of vacuum loading solids pumps across all industry sectors, globally.
